TW Solutions

TW Invoice

Regulations require digitalization.
TW Invoice turns it into an advantage.

CHALLENGES

01

NEW PEPPOL E-INVOICING SYSTEM

> Industrialize the processing of electronic invoices.

02

RISK OF IT COMPLEXITY

> Centralize invoice processing within SAP.

03

INCREASED OPERATIONAL WORKLOAD

> Automate invoice processing regardless of format.

OBJECTIVES

INDUSTRIALIZE

Seamlessly absorb the new European e-invoicing format without adding complexity to your existing SAP architecture. TW Invoice enables you to process all supplier invoice formats, from receipt to invoice parking.

CENTRALIZE

Many Peppol initiatives result in external platforms and interfaces with SAP.
With TW Invoice, a single cockpit allows you to centralize everything.

AUTOMATE

The digitization of formats (XML, PDF, QR code) could increase the workload of Finance teams. TW Invoice helps reduce it.

The key advantage: ensuring complete traceability.

OUR SOLUTION

1 Native SAP integration

TW Invoice est déployé directement dans votre environnement SAP*.

Les factures Peppol sont intégrées dans les processus MM/FI existants, sans plateforme externe de traITement process fournisseur.

INTEGRATED WITH SAP DRC	AVAILABLE ON ECC / S/4HANA	INTEGRATION WITH CERTIFIED PLATFORMS IN DEVELOPMENT

2 End-to-End Automation

Peppol, PDF, and QR-code invoices are managed within a single cockpit, with automatic data extraction into SAP fields and automatic invoice parking.

From receipt to validation, including account assignment and verification, the entire invoice lifecycle is digitized and standardized.

3 Unique cockpit

It provides a centralized view of all your supplier invoices:

- Intuitive navigation
- Simplified search capabilities
- Direct access to PDF documents
- Verification and account assignment without opening multiple windows

The intelligent split-screen feature allows users to view the PDF document and SAP data side by side, enabling faster and more efficient reviews.

As Peppol compliance currently applies only to Europe, SAP Document AI enables the processing of invoices from international suppliers directly within TW Invoice.

4 Licensing Tailored to Your Actual Needs

Subscription model based on the number of invoices processed.

** Available on ECC and S/4HANA (On-Premise, Private Cloud Edition).*
